PROFILE

Final-year Applied Programmer student with six years of hands-on programming experience across web, game, and mobile development. Proven hackathon track record with several first- and second-place finishes, backed by a completed SoftUni curriculum in C# and ASP.NET and practical exposure gained during an internship at Valtech. Comfortable working across the stack, from React and Node.js on the web to Flutter on mobile and Unity for interactive applications, with a growing focus on applying AI and API integrations to real products.

EXPERIENCE

Software Development Intern | Valtech 2025

- Completed an internship at Valtech, gaining first-hand exposure to professional software development practices, team workflows, and codebase standards in a corporate environment.

EDUCATION

Applied Programmer class | National High School of Mathematics and Natural Sciences "Vasil Drumev", Veliko Tarnovo Expected 2027

- Studying at one of the leading mathematics-and-science gymnasiums in the region, in the Applied Programmer specialization.
- Coursework combines general secondary education with a vocational focus on software development.

SELECTED PROJECTS

Zoodle | Real-time platform connecting citizens, vets, and rescue teams for animal welfare
Flutter · Dart · Firebase · Mapbox API · TensorFlow Lite (in progress)

- Built an interactive map where users report animals in distress by category, photo, and description, with live markers and one-tap navigation to the location.
- Added an in-app chat so rescue teams, vets, and the reporting user can coordinate directly from each marker.
- Designed an events/news module and a gamified profile with mission-based titles to encourage volunteering.

GitHub: github.com/Viktor-Nedev/Zoodle

CHORUS | Multi-user generative art installation, Hack the Arts Hackathon
MediaPipe · Web Audio API · Socket.io · p5.js · Three.js · Gemini API

- Built a real-time installation that turns participants' voices, facial expressions, and hand gestures into a shared generative particle artwork, with an AI-written poem for every saved piece.
- Added a Collective mode for up to 8 simultaneous painters, a 3D sculpting studio, and a Gemini-powered sketch-to-website generator.

GitHub: github.com/Viktor-Nedev/chorus

ELIA | AI sustainability companion, HackEarth Hackathon

Next.js · Tailwind CSS · Firebase · Gemini API · Three.js / React Three Fiber · Mapbox GL

- Built an AI eco-journal that converts natural-language daily logs into CO2, water, energy, and waste metrics using the Gemini API.

- Created a 3D interactive global impact map and a gamified learning hub with a physics-based sorting game, badges, and leaderboards.

■ TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Dart, HTML/CSS, SQL

Frontend: React, Bootstrap, Tailwind CSS, p5.js, GSAP, Three.js

Backend: Node.js, Express, ASP.NET, Entity Framework

Mobile: Flutter, Dart, Kotlin, React Native

Data & Infrastructure: Firebase, Supabase, SQL, Docker

APIs & AI/ML: Gemini API, Anthropic Claude API, Mapbox API, TensorFlow.js, MediaPipe

Tools: Git/GitHub, Visual Studio, Visual Studio Code, Unity, Antigravity IDE

■ CERTIFICATIONS

- SoftUni: C# Basics, C# Fundamentals, C# Advanced, C# OOP, Entity Framework, ASP.NET (completed with distinction)
- Telerik Academy: Web Game Development with JavaScript
- Cambridge English Qualification: B2 First
- Certificates of participation from numerous hackathons across a range of tracks and technologies

View certificates: [Google Drive folder](#)

■ ACHIEVEMENTS

- Crazy Golf: ranked 1st among all entries in a competitive game jam. A real-time, 4-player mini-golf web game built with vanilla JavaScript/Canvas and Supabase Realtime.
- SoftUniada 2024, 3D video game category: 2nd place for a Unity/C# cooking game, co-developed with a classmate.
- National Olympiad in Informatics Technologies (NOIT): qualified for the Regional Round in multiple consecutive years, consistently scoring around 90/100.

■ VOLUNTEERING

- Volunteer, “Varusha Yug” Festival, Veliko Tarnovo: supported event coordination and provided English-language translation for international guests.

■ LANGUAGES

Bulgarian: Native

English: Cambridge B2 First certified; fluent in technical and professional contexts

German: Currently studying, B1 level

■ INTERESTS

Hackathons and competitive programming, music (plays multiple instruments), civic volunteering, and emerging AI technologies.
